OBJECTIVE

Backend Developer with Java/Spring Boot, working with REST APIs, systems integration, process automation, relational databases, and applied Artificial Intelligence (Cartec Bosch). Self-taught and results-driven, seeking a remote Backend Developer position to continuously expand technical knowledge and contribute scalable solutions from day one.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript/TypeScript

Backend: Spring Boot, Node.js, REST API

Databases: PostgreSQL, pgvector

DevOps: Docker

Security: JWT, bcrypt

IA/Automation: RAG (Retrieval-Augmented Generation), Claude API, OpenAI API, embeddings and vector search, n8n, Evolution API, Prompt Engineering, Scikit-learn, XGBoost, SHAP (model interpretability), model ensemblings.

EXPERIENCE

Backend Developer — Cartec Bosch *Fev/2026 – Present*

- Developed an inventory module in Java/Spring Boot with automatic generation of revision items, integrated with a REST API and PostgreSQL database.
- Built a financial dashboard with process automation (RPA) for automatic analysis of PDFs and Brazilian electronic invoices (NF-e), eliminating manual data entry and reducing operational time.
- Implemented automated customer service via WhatsApp Business API, with generative AI agents (n8n, Evolution API, Claude API).

Backend Developer — Loja Rei das Válvulas *Jan/2024 – Fev/2025*

- Served as the technical lead for the company's internal digital processes, acting as the main point of contact for technology.
- Developed WhatsApp service automation, reducing customer response time.
- Maintained the inventory control system, including database adjustments and inconsistency corrections.

PROJECTS

MatchMind AI — Java, Spring Boot, Python, Scikit-learn, XGBoost — Sports results prediction platform with a Machine Learning pipeline.
