■ OBJECTIVE

I am a student seeking my first professional opportunity in the Technology field, with a focus on Junior Developer or Technical Support roles. I work well in teams, adapt easily to remote work (with strong commitment to meetings and punctuality), and I learn quickly. I am highly motivated to apply my knowledge, collaborate with talented people, and continue growing professionally.

■ EDUCATION

Centro Estadual Senador Jesse Pinto Freire

Technical High School — Computer Science

Period: 2021 – 2023

UNINASSAU (in progress)

Bachelor's Degree — Systems Analysis and Development (ADS)

Period: 2026 – 2027

■ TECHNICAL SKILLS

Languages: Python · Java · HTML · CSS · SQL

Frameworks: Spring Boot · Spring AI · Spring Data JPA · Spring AMQP · Spring Mail · Streamlit · Thymeleaf

Tools: Docker · Docker Compose · Maven · Apache Tika · Apache POI · pdfplumber · RabbitMQ · GitHub Actions (CI/CD) · SpringDoc OpenAPI / Swagger UI · python-dotenv · streamlit-authenticator

Databases: PostgreSQL · pgvector (vector extension for RAG/embeddings)

Other: OpenAI API · RAG (Retrieval-Augmented Generation) · Microservices Architecture · Event-Driven Messaging · JWT/bcrypt (authentication) · PDF parsing with regex · WhatsApp Web Integration (CRM) · REST API · Multi-stage Dockerfile

■ PERSONAL PROJECTS / PORTFOLIO

CARTEC 2.0

→ Production ERP/CRM platform for automotive workshops, running on a self-managed Linux VPS. Integrates WhatsApp AI agents via n8n and Evolution API, Claude Vision API for document/image analysis, JWT/bcrypt security, and nginx reverse proxy.

Fintrack

→ Web-based financial management system built for auto shops.

→ Link: <https://github.com/AdrianLopez001/FINTRACK-SYSTEM>

CareSync

→ Event-driven appointment scheduling and notification system built with microservices.

→ Link: <https://github.com/AdrianLopez001/CareSync>

Corporate RAG Engine

→ Enterprise-grade Retrieval-Augmented Generation (RAG) backend built with the industry-standard Java AI stack (Java 21, Spring Boot 3.3, Spring AI, GPT-4o-mini, PostgreSQL + pgvector with HNSW indexing, Docker, Apache Tika).

→ Link: <https://github.com/AdrianLopez001/Corporate-RAG-Engine>

■ LANGUAGES

- Portuguese: Native
 - English: Intermediate (technical reading and documentation)
 - Spanish: Basic
-

■ ADDITIONAL INFORMATION

- Availability for internship: morning and afternoon
- Areas of interest: backend development, AI, data, automation
